

From summer 2024, the total examination time has changed.

If you intend to use this with students allow them 1 hour 30 minutes.

GCSE GEOGRAPHY

SPECIMEN ASSESSMENT MATERIAL

Paper 3 Geographical applications

Specimen

Time allowed: 1 hour 15 minutes

Materials

For this paper you must have:

- a clean copy of the pre-release resources booklet.

Instructions

- Use black ink or black ball-point pen.
- Fill in the boxes at the bottom of this page.
- Answer **all** questions.
- You must answer the questions on the spaces provided. Do **not** write outside the box around each page or on blank pages.
- Do all rough work in this book. Cross through any work you do not want to be marked.

Information

- The marks for questions are shown in brackets.
- The total number of marks available for this paper is 76.
- Spelling, punctuation and grammar will be assessed in Questions 03.2 and 05.4.

Advice

For multiple-choice questions, completely fill in the circle alongside the appropriate answer(s).

CORRECT METHOD  WRONG METHODS    

If you want to change your answer you must cross out your original answer as shown. 

If you wish to return to an answer previously crossed out, ring the answer you now wish to select as shown. 

Please write clearly, in block capitals, to allow character computer recognition.

This draft qualification has not yet been accredited by Ofqual. It is published to enable teachers to have early sight of our proposed approach to GCSE Geography. Further changes may be required and no assurance can be given that this proposed qualification will be made available in its current form, or that it will be accredited in time for first teaching in September 2016 and first award in August 2018.

Section A Issue evaluation

Answer **all** questions in this section.

Question 1 Issue evaluation

Study **Figure 1**, a map showing the location of ten of the world's top ten megacities (2014).

0 1 . **1** On **Figure 1**, add the names of the **two** megacities to the correct boxes.

Use the information in the table below.

[1 mark]

| Megacity | Latitude | Longitude |
|-----------|----------|-----------|
| Lagos | 6 °N | 3 °E |
| São Paulo | 24 °S | 46 °W |

Study **Figure 3**, a choropleth map showing the percentage of the urban population living in slums in African countries (2010 estimate).

Figure 3

This source has been removed due to third-party copyright restrictions.

0 2 . **1** Complete **Figure 3** using the information below.

[1 mark]

Estimated percentage (%) of urban population living in slums:

Tanzania – 80%

0 2 . **2** What is the estimated percentage of urban population living in slums in Ethiopia?

Shade **one** circle only.

A Above 90%

B 81–90%

C 70–80%

D Below 70%

[1 mark]

Section B Fieldwork

Answer **all** questions.

Study **Figure 6**, a photograph of part of a river and its valley, and **Figure 7**, a photograph of part of an urban area.

Figure 6 – part of a river and its valley

This source has been removed due to third-party copyright restrictions.

Figure 7 – part of an urban area

This source has been removed due to third-party copyright restrictions.

.

| |
|---|
| 1 |
|---|

Identify **two** data collection techniques that could be used to carry out a geographical fieldwork investigation in **one** of the areas shown.

[2 marks]

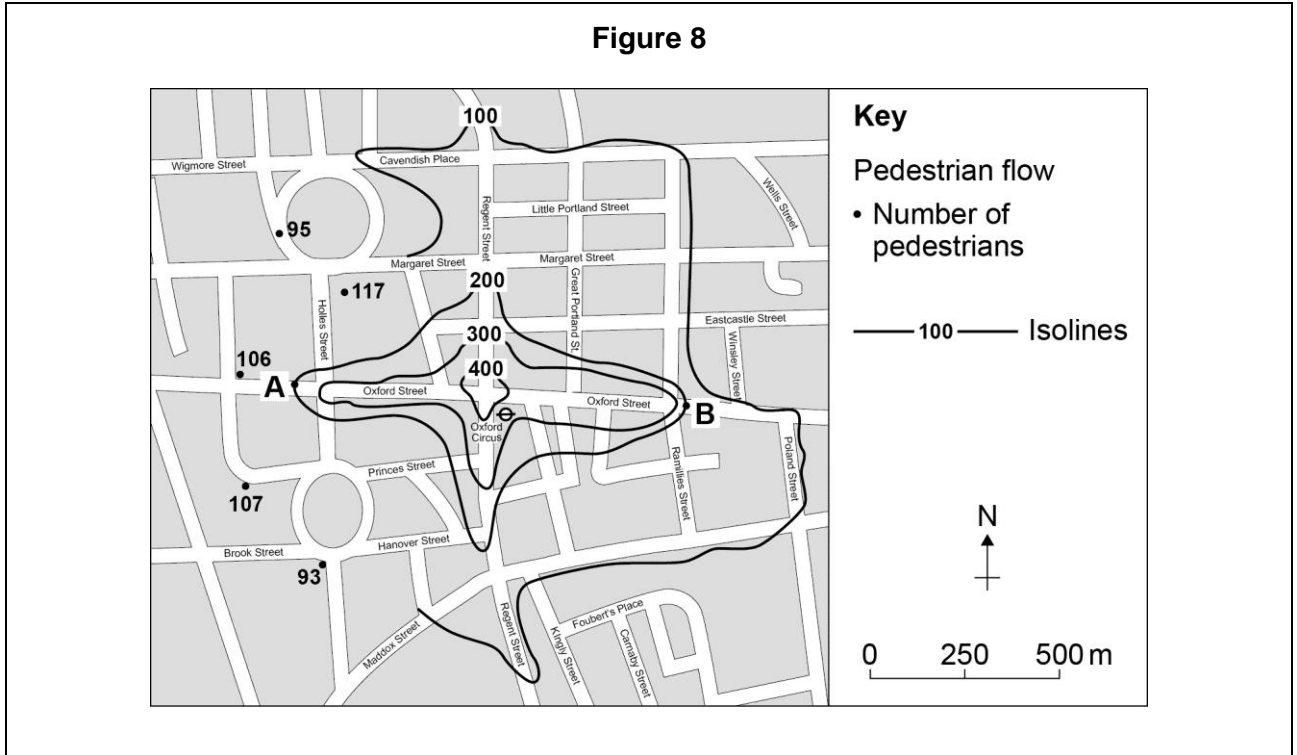

Area chosen:

Technique 1:

Technique 2:

Question 4 continues on the next page

Figure 8 is an isoline map of pedestrian flow in part of London using results from a 5 minute pedestrian count.

0 4 . **2** Complete the isoline for 100 pedestrians shown on **Figure 8**. [1 mark]

0 4 . **3** Describe the pattern of pedestrian flow shown on the completed map. [2 marks]

0 4 . **4** Suggest **one** alternative method of presenting the information shown on **Figure 8**. [1 mark]

0 4 . **5** Explain why the pattern of pedestrian flow shown in **Figure 8** may not be accurate. **[2 marks]**

Question 4 continues on the next page

As part of an enquiry collecting primary physical geography data, a student measured pebble sizes at one location on a beach.

The results are shown in **Figure 9**.

Figure 9

Pebble size is measured along the long axis.

| Sample | Pebble size in centimetres |
|--------|----------------------------|
| 1 | 12 |
| 2 | 5 |
| 3 | 7 |
| 4 | 9 |
| 5 | 4 |
| 6 | 11 |
| 7 | 9 |
| 8 | 11 |
| 9 | 6 |
| 10 | 13 |
| 11 | 21 |

0 4 . 6

Complete the dispersion graph below using the data for Sample 3 in **Figure 9**.

[1 mark]

04 . 7

Suggest **one** way in which the data collection technique in **Figure 9** could be adapted to make the sample more reliable.

[1 mark]

04 . 8

Using the data in **Figure 9**, calculate the interquartile range of the pebble size data.

Show your working in the space below.

[2 marks]

Interquartile range = _____ cm

04 . 9

Describe the pebble size data shown on the dispersion graph in **Question 04.6**.

[4 marks]

Turn over for the next question

0 5 . **1** State the title of your fieldwork enquiry in which **physical** geography data were collected.

Title of fieldwork enquiry:

Explain the advantage(s) of the location(s) used for your fieldwork enquiry.

[2 marks]

0 5 . **2** Justify **one** primary data collection method used in relation to the aim(s) of your **physical** geography enquiry.

[3 marks]

Primary data collection method:
